WORK EXPERIENCE

Visier Inc.   **Vancouver, BC**

Staff Software Developer   Aug 2025 - Present
- Served as the owner of Visier's tabular reporting product, a core platform capability that contributed to multi-million-dollar revenue growth. Designed and implemented the frontend architecture using Angular, Vite, and Jest, ensuring scalability, performance, and a polished user experience. Led cross-functional collaboration across developers, test engineers, product managers, and UX designers, working closely with backend systems built on Scala and Cassandra to deliver a mission-critical product.
- Mentored 6 developer interns since joining Visier, supporting their professional growth and project success.

Senior Software Developer   July 2023 - July 2025
- Designed and implemented usage instrumentation across major areas in the Visier platform which enables the monitoring and analysis of millions of queries run daily across the platform. Used Scala, Cassandra, and Kong.

Software Developer II   Feb 2021 - July 2023
- Shipped a feature that allows customer users to report, review, and correct data issues, significantly reducing support costs. Later extended this with an API enabling users to hypothesize changes to their data and view real-time analytics, powering the live preview capability in Visier's compensation planning product.

Software Developer I   Feb 2020 - Feb 2021
- Integrated Visier with a leading IT service management platform via a third-party IdP, enabling secure and seamless authentication for over 15 million active employee accounts globally.

Software Developer Co-op (Intern)   May 2018 - Dec 2018
- Created new APIs for querying data validation issues with server-side sorting, filtering, and pagination.

Quartz Imaging Corporation   **Vancouver, BC**

Software Developer Co-op (Intern)   Sep 2017 - Apr 2018
- Implemented an interactive homepage dashboard using JavaScript and C#.
